

# Infiniano™

## Instructions for disabling key repeat in Windows

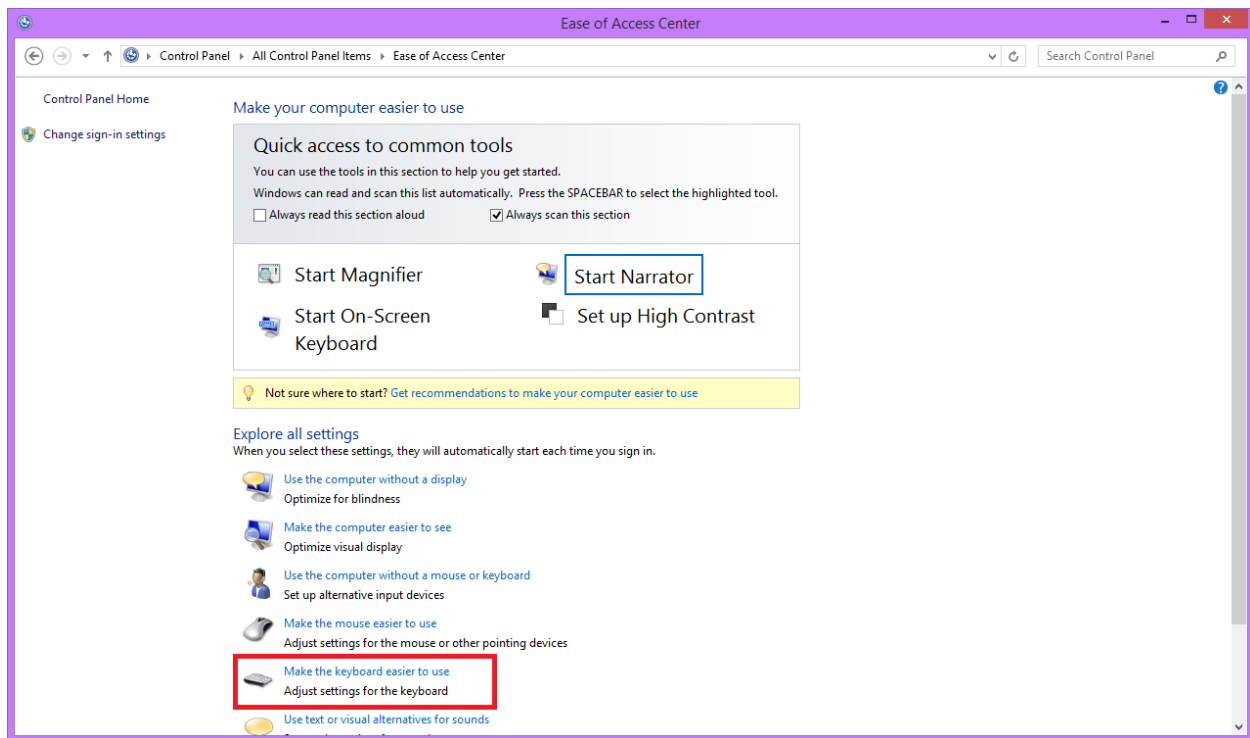

In order for Infiniano™ to function properly, the key repeat feature in Windows must be disabled. It can be re-enabled once you are done using Infiniano™. This document is a step-by-step guide to disabling key repeat in Windows Vista/7/8.

\*Disclaimer: The makers of Infiniano™ are not responsible for any changes you make to your system.

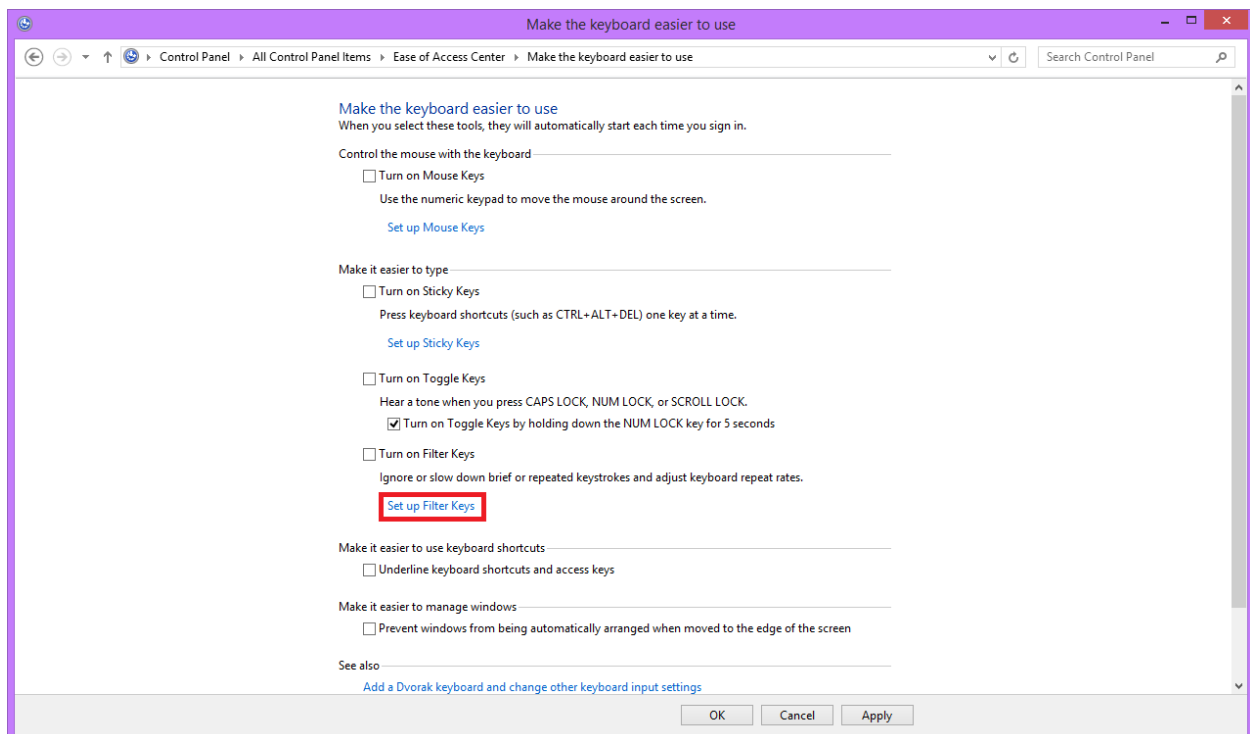

1. Open [Control Panel](#). Inside [Control Panel](#), select [Ease of Access Center](#).

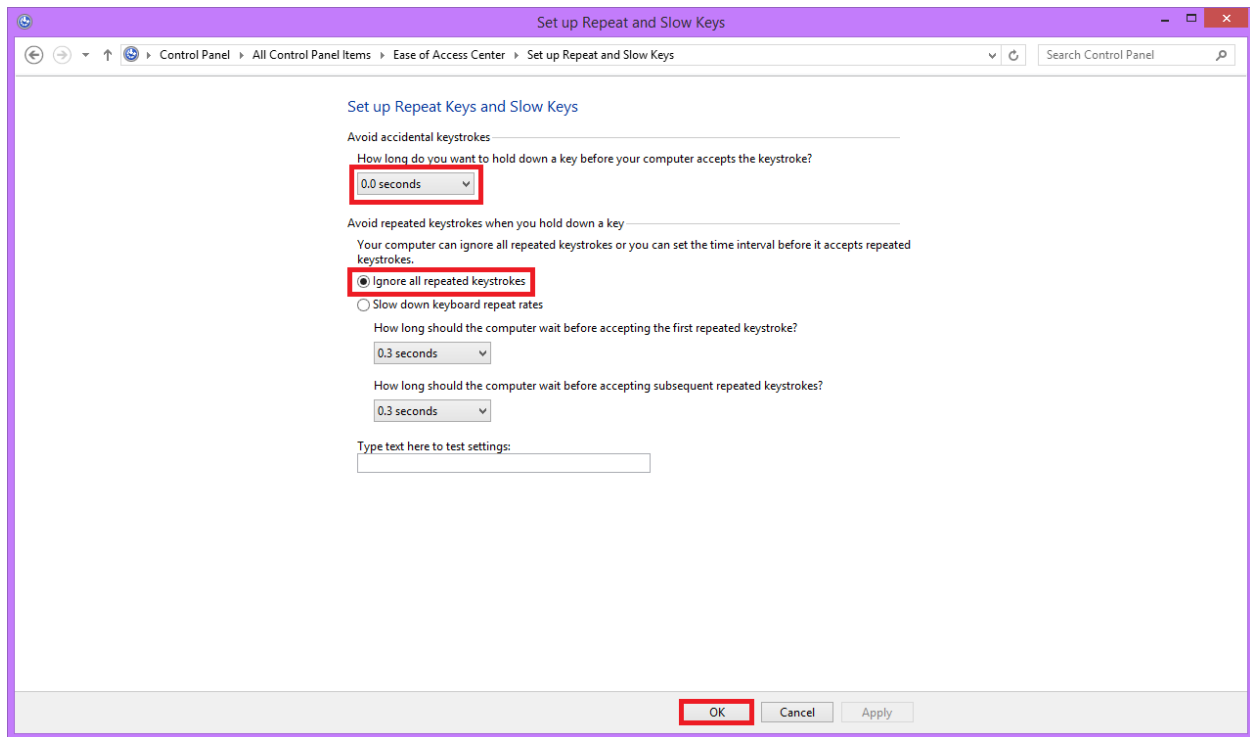

2. Click [Make the keyboard easier to use](#).

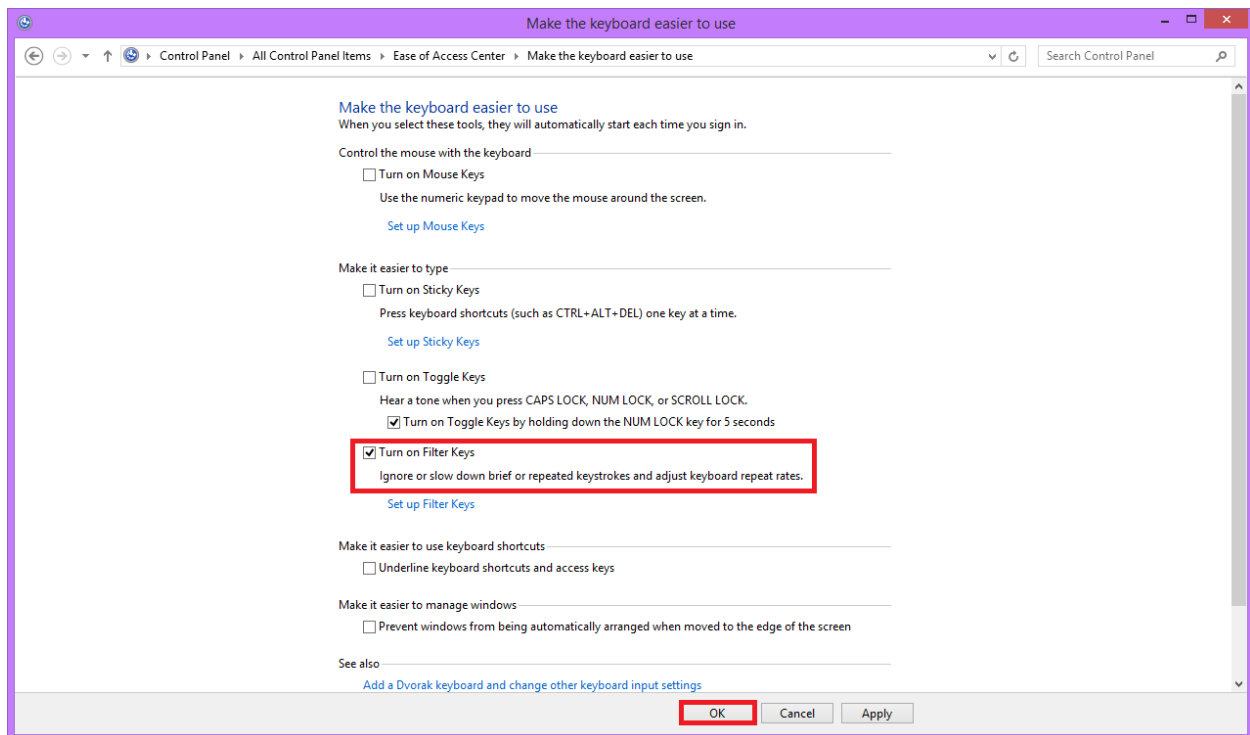

3. Click [Set up Filter Keys](#).

4. Under **How long do you want to hold down a key before your computer accepts the keystroke**, change the dropdown selection to **0.0 seconds**. Also, click the bubble next to **Ignore all repeated keystrokes**. Then click **OK**.

5. Finally, check the box next to **Turn on Filter Keys**. Then press **OK**.

Congratulations! Your system is now ready to run Infiniano™. Once you are finished creating beautiful music with our program, you can re-enable key repeat by going to [Control Panel-> Ease of Access Center-> Make the keyboard easier to use](#), and unchecking the box next to [Turn on Filter Keys](#).

Enjoy Infiniano!
